Project Design Phase-II Solution Requirements (Functional & Non-functional)

| TEAM ID | PNT2022TMID38603 |
|--------------|---------------------------------|
| | A Novel Method For Handwritting |
| PROJECT NAME | Digit Recognition System |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|-------------------------------|---|
| FR-1 | Input correlation | Image Correlation is a technique used to recognize |
| | | characters from images. |
| FR-2 | Data Preparation | Collecting data and prepare it for training |
| FR-3 | Feature extraction | Feature extraction is analysing the images and derive some characteristics from these images that identify each specific element |
| FR-4 | Character classification | During the classification phase, the attributes of the data in the picture are compared to the classes in the database to determine which class the picture belongs to. |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|--|
| NFR-1 | Usability | The software is very easy to use and reduces the |
| | | learning work.To recognize the digits from bank |
| | | cheque,papers,numeric entry in forms etc. |
| NFR-2 | Security | The handwritten digit recognition can be used by |
| | | banking sector where it can be used to maintain the |
| | | security pin numbers, it can be also used for blind |
| | | peoples by using sound output. |
| NFR-3 | Reliability | This software will work reliably for low resolution |
| | | images and not for graphical images. |
| NFR-4 | Performance | Handwritten characters in the input image will be |
| | | recognized with an accuracy of about 90% and more. |
| NFR-5 | Availability | This system will retrieve the handwritten text |
| | | regions only if the image contains written text in it. |
| NFR-6 | Scalability | It contains thousands of handwritten digits that have |
| | | been used in the development of programs . |
